

Mohamed Ghaith Romdhani

Ben Arous, Tunisia | ghaith.romdhani@ieee.org | linkedin.com/in/mohamedghaithromdhani

Summary

Final-year **Networks and Systems Engineering** student with a strong interest in **datacenters, enterprise networks, and IT infrastructure**. Completed multiple internships within **bank headquarters and datacenter environments**. Experienced across **networking, systems, cybersecurity (SIEM), AI, IoT, and sustainable technologies**. Former **IEEE Student Branch Chair**, current mentor, and national challenge winner with proven leadership and team management skills.

Education

Engineering Degree in Networks and Systems Engineering

- Higher Institute of Computer Science Mahdia
- Focus: Networks, Systems, Datacenters, and IT Infrastructure
- End-of-Studies Project conducted with a banking datacenter

Academic & Professional Training

- Completed academic and professional development programs with **AMIDEAST**.
- Focus on English proficiency, communication, and international collaboration.

Experience

AI Infrastructure & Security Analysis Assistant — End-of-Studies Project

- Developed an offline AI assistant in collaboration with **AMEN Bank** for infrastructure monitoring and security log analysis.
- Integrated **Graylog** and **Zabbix** to collect and analyze logs, alerts, and monitoring data.
- Designed a local **RAG** system using internal infrastructure documentation and machine inventory data.
- Enabled natural language interaction for interpreting logs, investigating incidents, and assisting infrastructure teams.
- Built the solution with a fully offline architecture to meet enterprise security and confidentiality requirements.

IT & Datacenter Intern (SIEM), Bank Headquarters

- Worked on **Security Information and Event Management (SIEM)** using **Graylog**.
- Log ingestion, analysis, dashboards, and alerting for enterprise environments.
- Exposure to datacenter monitoring and security operations.

Founder, Clothing Brand

- Founded and managed an independent clothing brand.
- Managed branding, marketing, logistics, and customer relations.

Volunteering

IEEE Student Branch Chair, IEEE ISIMA SB

- Served as Chair for **1.5 years**, leading a multidisciplinary team.
- Led organization of workshops, conferences, competitions, and technical events.
- Won multiple **national-level IEEE challenges**.

IEEE Mentor, IEEE ISIMA Student Branch

- Mentoring students in technical projects, leadership, and IEEE activities.

Co-Lead, IEEEExtreme Tunisia

- Co-leading national IEEEExtreme initiatives and team preparation.

Active Member, Leo Club Carthage

- Participated in social, humanitarian, and community service initiatives.

Projects

SmartShield — SIEM Platform

- Designed a SIEM solution using **Wazuh**.
- Centralized log collection, correlation, and threat detection.

SmartAero — Smart Aeroponic System

- Developed an IoT-based smart aeroponic farming system.
- Automated monitoring and nutrient delivery for sustainable agriculture.

Zima Green — Recycling Solution

- Built a plastic recycling solution producing **3D printing filament**.
- Manufactured customized keychains from recycled materials.

Technologies

Core Areas: Computer Networks, Datacenters, Systems Engineering, IT Infrastructure

Technologies: Linux, Networking Fundamentals, SIEM, Zabbix, Langchain, LLM, Graylog, Wazuh, AI, IoT, Virtualization, Cloud Concepts, RAG

Languages

Arabic (Native), English (Fluent), French (Fluent), Turkish (Conversational)
